

## Hide-a-Key

Never get locked out of your car again. Duct tape a key to the rest of the duct tape that covers the rust on your rear quarter panel. The only real trick is remembering which hunk of duct tape holds the key.

## Key Holder

Wad up a bunch of duct tape, sticky-side-out, and put it on your wall.

Then stick your keys to the wad.

It's functional and affordable, not to mention highly fashionable wall art.
